

- new phi-Hybrids:
- reduced load on clocks
 - improved signal driver
 - two-piece connector

- new repeaters:
- temperature sensors added
 - balanced stripline length
 - unique design for BST/FST
 - adapted for contact ring (FST)

- new subrepeaters:
- reduced thermal load
 - improved signal drivers
 - active clock distribution (with enable)

- new converter cards:
- improved signal drivers
 - voltage sources revised
 - CAN interface added
 - status monitor for PPCs added

FST Strip Repeater • Function Blocks
