

Schematic view of location and dimensions SToF

SToF consists of 2 layer plastic scintillating counters, installed around beam pipe inside of Hadronic Spacal. Each layer has 4 separated equal size counters, covered from one side with 1 mm Lead (black line on figure shows Lead covered side). Numbering of counters is also shown, where first and second layer corresponding numbers are divided by comma. The distance between layers is 110 mm. The thickness of plastic scintillator is 10 mm.
