Conditions for H1 authorship

The H1 author:

1. has to be physicist (diploma or equivalent)
2. has to work for H1 for at least 6 months as a physicist
3. participated in data acquisition shifts
4. participates actively in service and/or analysis work for H1

After leaving the H1 collaboration an author remains on the author list for one year.

Exceptions to these rules need explicit agreement of the spokesman.

Each group leader takes care of the authorship of his institute members. It is his task to

1. check whether a new H1 author fullfills the above conditions,
2. give the name of the new author to the scientific secretary together with the date when the H1 activities started,
3. to inform the scientific secretary on the exact date when an author leaves the H1 collaboration.
